1 Provide license for ibaDatManager Situation Detection

ibaLicenseService-V2 provides the license to run the Situation Detection in ibaDatManager.

Licenses Status				
License name		License Time Limit	In Use	Maximum
	ibaAnalyzer E-Dat	Unlimited	0	2
	ibaAnalyzer DB	Unlimited	0	1
	ibaAnalyzer DAT-Extraktor	Unlimited	0	2
	ibaDatManager	Unlimited	2	10
	ibaDatManager Situation Detection	Unlimited	2	5
Active licenses				
	Registered	Computer Name	Computer Address	Session Id
	01.12.2016 15:01:53	iba-fue-note318	192.168.41.60	6
	01.12.2016 15:06:01	iba-fue-wks276	127.0.0.1	1

ibaDatManager Situation Detection enables the function to define or select signal patterns in ibaDatManager. These patterns can be used to run a search for similar shapes in the history of .dat files. The search result for similar situations is visualized in ibaDatManager. The license for ibaDatManager Situation Detection is a floating license like the license for ibaDatManager.

2 Save Information for iba Support

ibaLicenseService-V2 provides the generation of a support file. The support information contains the configuration and software status information as log files.

3 Improvements

1. Display license registration time in detail view
2. Service logs and configurations are now located in C:\ProgramData\iba\ibaLicenseServiceV2
3. Nonadmin users can now start/stop license service
4. Reduce logfile size and enable logfile compression
5. Display changelog
